Subject: RE: Superfund question

Hi Steven,

Each Superfund site is different. The San Francisco Bay Area Superfund sites were established decades ago and they are managed to be protective of human health. Not all of Sunnyvale is within a Superfund site. A website that will help you determine where the Superfund sites are is: <https://www.epa.gov/superfund/search-superfund-sites-where-you-live>.

Under Superfund EPA does not generally provide testing unless the testing is part of a specific Superfund Site program.

I hope this helps,
Michael

Michael Schulman
Remedial Project Manager

Subject: RE: Superfund question

Hello Steven and Neha,

Thank you for your questions.

I'll refer you to Mr. Michael Schulman who is the Project Manager for the most active Superfund sites/the Triple Site. The Triple Site comprises: 1) AMD Micro Devices, 2) Phillips, the former Signetics site; and 3) TRW Microwave, all located in Sunnyvale.

He may also have suggestions for getting environmental testing in the area.

Sincerely,

Angie L. Fuoco

Subject: Superfund question

Hi!

We're thinking of moving to the Sunnyvale area and wondering what is the recommended distance away from a superfund site to be considered safe for long term health? Also is it possible for me to get ground water near me or air tested for a home that I'm planning to buy?

Thank you so much!

Neha
